Flexi-Pile Caps

The Flexi-Pile Cap range has been developed to solve common OLE piling challenges quickly and safely — without the need for hot works on site.

Patent No: GB2537074 & GB2555065

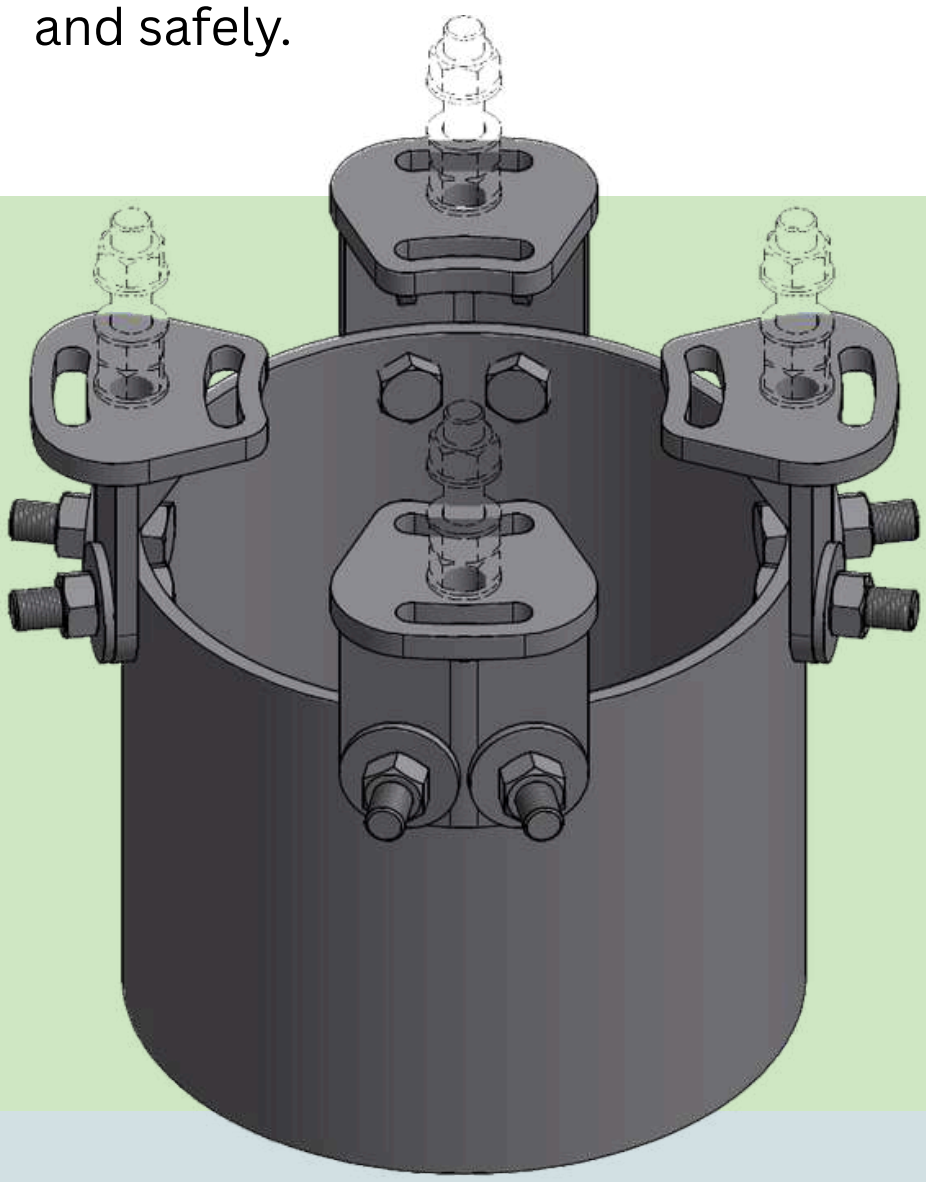

Flexi-Pile Caps provide an interface solution for mounting OLE structures onto CHS piles that are:

- Damaged during installation
- Out of alignment or positioned incorrectly
- Refused early before achieving full depth
- Positioned incorrectly
- To bridge existing services

The system includes a complete range of tabs and bridging beams designed to overcome installation issues efficiently and safely.

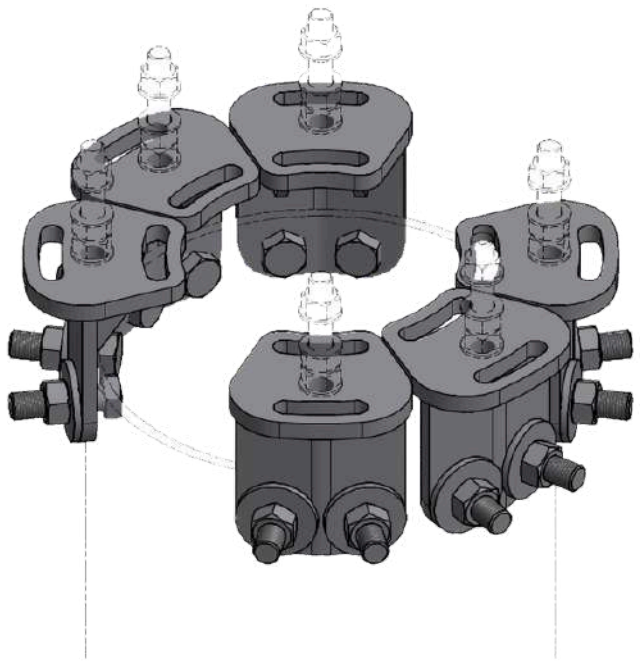

Key Benefits

- PADS & Master Series approved.
- No hot works on-site.
- Light weight / Hand carriable parts.
- Faster installation, hours, not days.
- Reduced programme time.
- Improved workforce safety.
